Relevant Professional Experience

Front-End Web Developer • **Leonteq** • Sep 2022 – Present

- Maintained the internal design system, a collection of reusable components guided by clear standards for building all the applications, significantly improving developer productivity
- Built the HUB project, an application that makes use of micro frontends and aggregates the company's apps and websites for easy search and discovery in the browser
- Built and maintained various projects such as campaign websites and annual reports, enhancing user engagement and understanding of the company's solutions

IT Consultant • **Aubay Portugal** • Sep 2022 – Feb 2024

- Worked as a front-end web developer for Leonteq, a Swiss fintech company with a leading marketplace for structured investment solutions, which was one of Aubay's clients

Full-Stack Web Developer • **C4W Labz** • May 2019 – Aug 2022

- Built an application for a mid-sized company to manage health insurance sales all over the country, optimizing the entire process by more than 25% and increasing the yearly revenue
- Built an application to be a platform for large-scale negotiations (buying and selling) between companies, helping to sell excess stock and reduce idle inventory
- Built an application to facilitate heavy- and light-duty cleaning services between the end customers and cleaning professionals

Full-Stack Web Developer • **Self-employed** • Jul 2018 – Apr 2019

- Built an application for a large company to manage the pending, ongoing, and completed employee tasks, which shortened the time between detection and task completion by more than 15% and facilitated managerial data analysis
- Built a web dashboard for a small company where they could dynamically update their institutional website's content, eliminating delays between content creation and its availability to customers

Full-Stack Developer • **Ftp Info** • Mar 2014 – Aug 2016

- Built an Android application for a mid-sized agricultural company to enable employees to collect and save data directly in the field, boosting productivity and ensuring faster data availability on servers
- Built a desktop Java application for a mid-sized company on top of an existing database to improve data manipulation and generate complex reports, improving employee productivity and enabling better data analysis by managers
